

The Anunnaki & Humanity's True Origins

Eluña Noelle

- 00:00:00 Hello and welcome back to another Channeling After Dark. In this episode, I choose to look into the origins of our species and the relationship that we have with the Anunnaki, who are these beings from Orion, the Orion constellation or Orion constellation. And essentially, I have asked the Akashic guides if I was even capable of looking into this, and if I could, then if I would...
- 00:00:32 if the information would come through accurately, because I know that there has been an attempt to sequester this information, and I just wanted to make sure that I would actually be able to see things clearly and accurately. So they did tell me that I would be able to. I will say that I have actually just finished looking into it all, and I had to get their help a lot. I had to get the help of the Akashic guides because it was really a lot for my human to see all of this, and hearing a story is not the same as seeing and experiencing a story, as I'm sure you understand.
- 00:01:15 And so it was a very interesting experience to see all of this and to hear things that I have never heard before, truths about our origins and the story of our evolution of course, manipulated evolution, but the story of that. I, there, there are just things that I have never heard, that I am attempting to integrate right now. And there were also...
- 00:01:47 There was energy from what I was witnessing that was also difficult to, to perceive with either my eyes or my ears and clairaudiently and clairvoyantly, to be accurate. And so I needed to get help. And there were there are many times in this transmission where I, I have to pause because my human is struggling with the information and/or because I have lost the frequency thread that I'm using to see the story, the thread that's in the Akashic

Records for me to witness what happens.

00:02:33 So please be patient. I will just ask that now, and thank you for your patience, and also apologize for that because it's really a there are a lot of times when I pause. So because there are many times I pause, you may find that you need to pause when something really big comes through and really that makes you think deeply. You may find that you need to pause as well, so I encourage you to do that. I left the story at a certain place because I had been in the, in the Akashic space for a very long time, and I could just tell that my energy needed me to, to come back to my body.

00:03:11 So I will come back and revisit this again, I, because I am extremely curious about what will come through, but just know that there will be a follow-up to this, to this information and more of the story as, as much as I am able to access and, and release. So thank you again, and I hope that you enjoy this exploration into our origins.

00:03:46 Okay, beloved Akashic guides. They are saying, "We are going to take you on quite the journey today because you are ready and have asked the appropriate question for us to do so. We are going to look into the true origins of humanity, the genetic origins of humanity, and go into the chapter that led up to humanity becoming conscious of itself."

00:04:23 Okay. "Beyond the animal consciousness that it was originally b- created with and born with." So where would you... Okay. They are showing me a a, a process of, of a very h- fast, sped-up process, essentially, of cells evolving and that process, and it, it really did start in the the s- the...

- 00:05:17 They say the briny, muddy waters of the ocean really is where life on this planet sprouted from, and it was given a single point of consciousness to start this process of life with, and that one single point of consciousness evolved and grew. So that, that was the natural beginning of life on planet Earth.
- 00:05:51 Then came the time of interference, they say. So this is then many... This is far into the future many m-millions of years for the Earth of, of process. That now there are a, there's a wide diversity of species on the planet, and yeah, I have so many questions coming up, but let me, let me see if the where the, where the Akashic guides want to take this, 'cause I really am letting them lead this.
- 00:06:23 So let me see where they wanna go before I ask questions. Okay. They say, "We do want to take you right to the heart of the matter. There are many explorations that could be done looking at this time and looking at where, what species evolved in which way, but that's not the purpose of this transmission." So please go ahead, and thank you.
- 00:07:12 I- it's very interesting. I can tell, just to share this with you who are listening, there is a very This is a very interesting energy to tune into. The only way I can, I think I can describe what it feels like to look into this is it is like there has been an attempt to hide this piece of information, and so the frequency, the bandwidth that I am tuning into is extraordinarily thin, and it's, it's extremely difficult to hold my focus because the bandwidth is so thin and, like, translucent almost.
- 00:08:04 It's a, it's a difficult thing to explain, but it's easy to lose. It's like trying to find a fishing w- line in the night. It, it, it's very difficult to find it. So forgive the pauses while I keep reattuning to this because I, I can just tell this has tried to be hidden, which is why I did a lot of questioning in the beginning of if I could even look into this. So thank you for your patience while the line comes in and out.

00:08:37 Let me find it again. Okay. I am open to seeing you can show it fully. Thank you. Okay, so what I am seeing is actually for the first time in my life the true image of reptilian beings.

00:09:14 I have This is perhaps a s- it's a more complex explanation, but things appear differently in the Akashic records based on your level of consciousness. I, I That's the easiest way to say it, and I have only seen one impression of a reptilian being in my lifetime, and now I am seeing it accurately. I'm, I am able to perceive it actually how they appeared, and they are they are very different to the human eye.

00:10:00 So I'm just adjusting. One moment. Oof.

00:10:29 Okay. So it's my, my nervous system, my human is a little, it's a little bit uncomfortable to perceive them so clearly, so my heart keeps getting a little the My heart starts to race a little bit, so I try to calm it down again. My higher self is totally fine. My human self is not, has not seen this so clearly before, so it's just a little bit of an adjustment.

00:11:06 Didn't foresee this happening. Let's see. Oof. Yeah, it's it's, it is challenging to see their faces. At least this one face in particular really is challenging because it is quite sinister looking. So it's a little bit okay.

00:11:42 It's actually j- I didn't know that it was going to be I don't even know if I can show this. This is a lot. I might have to adjust before I actually show this. Okay.Um, th- yes, please. I think that just for now to get the story through, that would be I would really welcome that.

00:12:17 Thank you. Okay. So the Akashic guides are able to give this... It's actually a veil over my, my inner eyes, and that is how I have perceived these b- beings before. So I'm gonna do that. I'm gonna... I asked them, they actually offered if, if they, if I wanted them to do that, and so I am going to have that so that I can tell you the story, and then at another time I can go through the process that I need to go through to, to perceive these beings accurately.

- 00:12:55 Because when I am in the Akashic records, I am perceiving the... It is like I am there in person or in spirit form, if you will, with whatever I'm seeing. But on top of that, because I am in the Akashic records, I don't know how, why I, I can do this, but I can also see the energy of the being, and so the energy with the face is just a lot.
- 00:13:25 It's, it's a little too much for me. It, it ma- it keeps scaring my heart. I'm okay, but it keeps scaring my human, so, and, and bringing up other things, other images. So now I have this veil and I'm, and I'm going to be able to proceed a little more easily. So let me tune back into this frequency now that you understand what I'm going through. Just one moment.
- 00:13:56 Okay. So where I am picking things up is where the Akashic guides are, are starting me. Wow, that's a lot more complex than I realized. Do I have all of that accurate the way that that has just come through?
- 00:14:25 Okay. So they're starting with a little backstory. Beings from the Orion constellation, they came from another universe, came into our universe, went to the Orion constellation, decimated their planet. They, they, they used all of the resources, they extracted everything. They, they were not able to learn how to live in harmony with their planet and, and, and for that matter with each other.
- 00:15:03 And so they have... And, and actually the origins of this on our own planet comes from them. They have a top-down hierarchical structure, and that is, is... And, but it's a, it is a non-collaborative, disharmonious, and exclusive top-down hierarchical structure.
- 00:15:33 Hierarchical structures are not inherently negative. Having beings that... Having a, a small group, if you will, of beings that are overseeing things on behalf of a majority can be highly beneficial because it means that different beings within whatever this population is are able to specialize and, and it actually increases the productivity and harmony of the system overall.

- 00:16:03 A- an example of this is honeybees having a select few drones which are male, and then the majority of the hive are worker bees which are all female, and one queen. The, the queen is technically the top of the structure, and she specializes in laying eggs, so she doesn't... She's the main and most important part of the hive from the sense that she is the only one who lays eggs.
- 00:16:40 She specializes in that, and the hive will die without her, and that's a top-down hierarchical structure. So those structures are not inherently bad. The difference is that in this particular experience with the beings from Orion, the top-down, they, they, they were not working for the benefit of all, o- o- o- of even their population. It, it was rather chaotic, and it was more of a f- it was a fear-based top-down structure instead of a collaborative creation love-based top-down structure.
- 00:17:23 So the Akashic guides are wanting to make that known. So these beings from Orion, after they decimated their own planet and used up all their resources, they then, they saved enough resources to create space travel, and they also can move between dimensions.
- 00:17:54 So, so they're, they're able to move between the third and fourth dimensions. They traveled through our universe, and this has been going on for in our human experience a very long time, for hundreds of thousands of years, I guess millions of years. Yeah. And millions of years for, for us as humans. And they would go to different planets and essentially repeat the same thing.
- 00:18:25 They would go to a weaker planet and then extract the resources, and that was really it. They, they, they decimated the cultures. They destroyed information and knowledge, but took all the resources. So that is something they did. They also went around for certain with certain beings, they extracted genes.
- 00:19:02 They extracted DNA, okay, and other genome genomes from different beings

around the universe, and they had a bit of a collection going of different... Because they considered that a resource for-- they considered other beings a resource that could be used for, for their own use in terms of slave, slaves essentially is what it is.

00:19:35 So they, they had a small collection. It -- Not all of the... They n- they only went to certain planets i-initially. They went to certain planets that the beings were b- weak. They didn't, they didn't have any sort of defenses, and not all of the genomes could be extracted. Not all of the genomes would work, so they didn't do this with every single planet they went to, but they did it with many.

00:20:03 Fast-forward, they-- after a long time of them doing this, they come to Earth and have kind of evaded... They've come to this place in the s- in the universe where they have, they have kind of evaded a lot of beings who would otherwise be kind of after them. Is that an appropriate way to say it? Okay. And they land on Earth, and they want to basically do the same thing.

00:20:37 They want to extract the resources from this planet to grow stronger and they realize because this planet, the the resources are in the third dimension, they are physically based. They, they also... The, the extraction of those resources will be a, a daunting task. It will take a lot of work and effort to make that happen because it's such low density.

00:21:13 So they set out to create a race of slaves, of, of slave beings that can work for them and extract these, the, these different resources and minerals primarily. Okay. So they're, they're wanting to take me to... now that, that, that backstory is clear, they're the, the Akashic guides are wanting to take me to when the shift happened.

00:21:51 Okay. So they want us to talk about first the initial the, the prototype of hum- humans and then the-- what, what ended up leading to a different form of humans.

00:22:19 Okay. So there were actually many experiments conducted. Wow. So i- Ugh.

- 00:23:02 Okay. That is fascinating. So they are showing me and describing all of these different classes of animals and the way that things evolved. So when they arrived here, again, this planet is full of... It, it is a mineral-rich planet, which is primarily what they're going for.
- 00:23:34 There are various creatures that have evolved with very simple creatures, of course amoeba and all of that leading up, and bacteria, leading to creatures with shells, jellyfish creatures that live in, different types of worms and nematodes, creatures that live in the soil.
- 00:24:18 Single-celled organisms, yes, leading up to very simple multi-celled organisms currently exist. They all are the they are primarily have an exoskeleton. That's the majority of what is on this planet. It looks like there is really not a lot of, of...
- 00:24:48 There, there are not yet creatures without an exoskeleton or that do not have a spinal cord. So i-- there are invertebrates, and those with exoskeletons, which are also invertebrates. So the first shift that happened was they created vertebrates.
- 00:25:18 The idea being that these vertebrates would -- th-they were really experimenting with some of the genomes that they were carrying, and then some of the DNA sequences, excuse me, that they were carrying, which do include genomes, and then some of the DNA sequences that are-- were available already on this planet. So they actually helped evolution along in many ways.

- 00:25:52 They did speed it up quite a bit for different creatures and, and organisms. The first-- the, the only vertebrate animals or the first vertebrate animals that they ended up changing were fish. So fish, yes, they became amphibians, amphibious creatures, but eventually those amphibious creatures moved into reptilian creatures, which was they used more of their DNA to mix with the creatures that were already evolving on this planet, and that is where...
- 00:26:49 Birds or both? Then birds. Okay. That's where dinosaurs and then eventually birds emerged from. Okay. And then eventually they get to this place of using even more different combinations and more complex combinations of DNA sequences from a variety of creatures.
- 00:27:26 And if we fast-forward, they, they eventually come to the time of creating chimpanzees.
- 00:28:15 Did they really create everything?
- 00:29:11 My human is having a really hard time with this information. There is a lot-- there are a lot of questions coming up in this of, of just how can... F-firstly, in, in essence, this is saying that all of life, just about, on this planet comes from these beings that represent so much death.
- 00:29:49 I, I, I j- that, that is a very... Th-and, and have destroyed so much before they have arrived here. That is a very hard thing to believe that they are basically the creators of the, the beauty of life on th is planet. I, I-- my human is really struggling with that right now, and I'm trying to understand by asking the Aka sha guides and They're ex- they're, they're really explaining a lot.
- 00:30:26 They're saying that that is part of the reason why there is this sense of ownership. Wow. That there is this sense of ownership from these beings and why they call themself, one of the reasons why they call themself God, and have created many structures and systems within, and programs within this world to take over and consume the minds of who is here to say that

they are God and for people, for humans to worship them as God because they have created so much life.

00:31:21 And I really am having a hard time with that. My human is not wanting to accept this as true at all. I, it is This is, this is one of the most challenging things to accept. I. They, they are, they are giving me all of these insights into They're asking questions of me and then answering those questions in a way, and giving me images, and getting me to talk to them, the Akashic guides that is, saying, "Why..."

00:32:03 Like, "Why do you think the nine levels of hell exist? Why do you think a seed starts in the darkness? Why do you think everything starts in the darkness and then is born into the light?" Because that is the pattern of what these beings are actually also evolving out of, is being born in darkness, and the idea is that they will evolve and fluoresce into the light.

00:32:39 And so this is not just birthed in light, which many other interdimensional beings have been birthed in light. That is not the story of this planet. There is nothing that starts on this planet that does not begin in the darkness, the darkness of the seed, the darkness of the soil, the darkness of the ocean, the darkness of the womb, the darkness of the egg, the darkness of unconsciousness before becoming conscious.

00:33:14 And so I am. That is why that pattern is here. It. Wow. And so that is why this planet has been called the greatest experiment of all time, because these beings that represent essentially death, destruction, chaos, darkness, have supported the creation of life on this planet into the light.

00:33:58 It, it is And, and that, that is a very. And it has been, there has been other beings that have involved themselves in various beings that have evolved on this planet. There have been certain, because again, there are certain DNA sequences that have been brought in either by these Orion beings, and in some cases secretly by other beings, like the Pleiadians.

- 00:34:30 There are other beings that have involved themselves, the mantis beings. They have involved themselves by imbuing their own energy, their own consciousness, and their own DNA into what is happening, again, to participate in this experiment, and that is just a lot. So Okay. Thank you. They're going to take me now, the Akashic guides are now going to bring me to how this shift happened with using primates, attempting to use primates, and that evolved into a Neanderthal-type being, if you will.
- 00:35:19 Again, the beings from Orion, the reptilians, evolved the evolved the creatures that we hear into a Neanderthal-like being. That is what happened. And then the Neanderthals Okay.
- 00:35:58 They were very, a slow pace, slow in almost every way. They were slower, and they really, they, they were not they weren't very intelligent. They didn't think a lot for themselves, and so they were easily, easy to control in a way, but they also were very unintelligent and so difficult to teach things to, and that is why these beings, the AnunnakiThe reptilians, they're, they're the same be the, the beings from Orion.
- 00:36:36 They're all the same. That is why they were kind of let go of, because they let go of the Neanderthals because they really could not do what they needed them to do. They could, but it was slow, took a very long time to teach them things. It just wasn't what they wanted. They wanted things to be a bit faster. So they then put more DNA together, and now we get to Homo sapiens, which the sequence of how that happened in terms of the genetic sequence is quite complex, and they're saying it's unnecessary actually to go into that and explain what was going on there.
- 00:37:25 It's important to know the story more than that detail in this moment, so okay. So what happened after then Homo sapiens were developed? What took place? Okay. They catered to the Anunnaki, and at this time, after these Homo sapiens were created, and after all of this experimentation had been done on the planet, and even more resources started to be available in the form of food and just other resources, other minerals, other things, other

plants, plant materials, other things.

00:38:20 There was a kind of a, a change of heart with the Anunnaki where they thought, "Why would we leave so soon?" Is that accurate? So they decided to prolong their time here, which necessitated more humans to be serving them, to be slaves to them. And this is where they're saying they want to highlight what's happening.

00:38:53 Okay. And thank you. Yes, please keep that.

00:39:30 Okay. So it seems like some of the population of Anunnaki live on ships that are landed. Some of them live underground. And then it's rare for them to They, some of them come above ground, but they really do spend a lot of time underground just because they're not that accustomed to the brightness of day, so they don't, they don't really come out during the bright, bright daylight.

00:40:09 Midday is a time when they are kind of gone and underground or inside somewhere. Okay. And so the be they're explaining that there are not that, that many Anunnaki that kind of wander around with the humans. It's just not that common. It looks like there are at least the upper echelon of the Anunnaki don't really mix with the humans.

00:40:48 There are kind of lower classes that, that in, within the Anunnaki that are more worker-oriented, and they, in a sense, watch over the humans, but they don't really interfere that much. They don't, they, they kinda just watch them. They don't even talk to them. So I in fact, do humans... Do they have speech at this time? No. Interesting.

- 00:41:18 So these Homo sapiens, they really are extraordinarily primitive. I mean, they are raised without language, and they are just taught to, to do, to carry out a variety of tasks. It just depends on the task, whether it's feeding other humans by, by picking food and putting it somewhere, but really...
- 00:41:51 And that only happens later. In the beginning, the humans just kind of they just kind of go trying to find their own food, in a sense. Like, they're given a place where there is food located. I mean, yeah, the it's almost like a, like a feeding trough for them, is a way to look at it. But in general, they, they, they really don't do anything other than what they're, what they're told to do, which is...
- 00:42:26 I'm curious, how are they told? Like, how do they know what to do? It is. They're saying it's just from watching others. So when they're put in a certain place-Uh, such as being underground and maybe mining for certain resources. With, with, with with their hands, by the way, so there are really no tools. It's not like they, they don't have any tools available to them. It's, it's doing things in a very certain way, and it takes a very long time, which is also why they got more humans to be created.
- 00:43:05 They just are, they watch wherever they're put, what is happening around them, and then they do that thing. So i-it's, it's v- it's again, it's extremely simple. Monkey see, monkey do. That, that's... It's a very, very simple creation at this point. So, and they, they do not have spoken language. Okay. This goes on for some time, they are saying, and the humans are really perceived as, like, pets.
- 00:43:52 And... Okay. So this is where they are talking about Enki and Enlil, these two brothers, they're saying, whose story plays out again and again on planet Earth, and is still playing out.
- 00:44:36 And so they are describing that Enki is this kind of overseer, if you will. He goes around where the humans are working and takes data on them

essentially. He, he is a gene- a master geneticist.

00:45:08 He is the, the one who's kind of behind all of these creations, and what he has helped create feels beautiful and extraordinary. They, the, these other, this, this group of Anunnaki have never seen a planet with so much genetic diversity embedded within it, and so they have never seen this this diversity of creatures present on a planet that has, that they have created at this point.

00:45:43 And so Enki, I can see he, he, because he is a scientist, there's, there's a, an objectivity to him and, and a, and a, a, a kind of aloof nature to him demeanor looking at his creation, and y- and yet the beauty and the love that he has developed for what he has created has really started to grow within him because he has become deeply interested in how some of these creatures species that he has helped make, how they have actually taken off on their own accord.

00:46:29 They, they, they have started to evolve, for example, into varieties of species, a-and that really excites him. He's never seen something like that happen before because they've never been on a planet long enough to, to witness that. And so that participation in creation has awakened something within him, th-that there is something new in him that has not existed before. It, it is, it is this act of creation and seeing things come, come into manifestation and into creation that is, it creates a love of beauty within him.

00:47:10 That, that is really how, what starts, something that he has not had before. That begins to awaken a space within him that is his heart center that previously has been completely shut down and and, and doesn't actually really exist. It looks like it's it's kinda looks like a void space energetically just in him, but, but that's changing because of his involvement and interaction with this Earth and her energy and creation.

00:47:48 That in turn awakens, begins to awaken a love of humanity. He begins to fall in love with this, these simple creatures who clearly are bred to serve, but the

service that they give makes him love them. So now there is this awakening of mutual reciprocity that starts to dawn in his awareness.

- 00:48:22 It's something that previously has not existed in his species at all. His species, the Anunnaki, his race of beings, I guess, they have only been in a consumptive and a self-serviced way. They have not ever thought about mutual reciprocity. They have not thought about the exchange that can happen. It's been a one-way for them, and now there's this two-way opening up in Enki.
- 00:48:55 That is the starting of the evolution of their entire species because of the creation of humanity. That's interesting. So then what happens? So then humanity goes on...
- 00:49:37 I'm sorry, can you say that was very fast. Can you start that again? What happened between them? Okay, there's some kind of disagreement that takes place between Enki and Enlil. It's very difficult to keep my mind on it. It hurts my head, actually.
- 00:50:06 I see. There is this disagreement that happens between Enki and Enlil. When Enki goes to Enlil... And, and, and I, I it seems like, please correct me if I'm wrong. Is it just giving another update, and then all of that takes place? More or less. So Enki is going to give a report essentially to Enlil, and when he is doing so, because he starts to speak about humans, there is a frequency and actually a smell.
- 00:50:58 Is it an energetic smell or a literal smell? It's both. The Anunnaki have this ability to smell frequencies. I don't know how else to say that. They smell frequency, and they smell emotion, which is a frequency. And so Enki starts to emit and smell like love and, and compassion, sympathy, empathy, all of that.
- 00:51:31 And Enlil smells this and immediately recognizes that Enki is now weak. That is one of the, the ways that the Anunnaki have evolved out of feeling and

loving, is that if someone feels that way, again, because their hierarchical structure is based on fear, if someone was born with that, the either they die, or as a child, it's immediately wiped out of them so that they don't grow up with that because it's a sign of weakness, and then they will eventually die.

00:52:09 So it's actually their evolution has been to not have empathy at all because it means they will die by their own hands, by their species' own hands. Okay. So Enlil smells this on Enki and accuses him of falling in love with with these creations and saying, "You are weak. You have become weakened by spending all this time with the humans," is essentially the message.

00:52:43 And it's very difficult to actually hear that language. It's a little, it's a it's... There's something about it that is a little bit challenging. One moment.

00:53:13 Yes, please. I will watch from above. Thank you. Translate? Thank you. Enki is saying that you've become weakened by spending so much time with the humans. You have started to develop the softness like their skin, and you are being led astray from the amount of time that we have spent on this planet.

00:53:49 You have not seen and participated in our... It's a message like the type of power that they have paired with their natural like their natural role in the universe paired with their evolution.

00:54:19 There's a word that kind of encompasses all of that that is very sacred to, if you will, sacred to the Anunnaki, and he's saying you've lost that within you because you've spent too much time on this planet. You haven't consumed enough. You haven't destroyed enough. You haven't acted with this natural energy that he's referring to.

00:54:50 You've only been creating. And so that you've only been, he's kind of mocking him saying, "You've spent all this time in your lab, and now you've spent all

this time with these this creation, and you haven't of humans, and you haven't been acting your part. You haven't been acting by your nature", is what he's kind of getting at. It's a, it's a very, it's a sign it's, he's intending it to be deeply insulting.

00:55:20 Complex language. And the thing that's important that the Akashic Guides are explaining, it's important to understand that he is intending it for, for it to be insulting, but more importantly almost, is that he is saying it in a threatening way. He's threatening Enki. This is like the opening to death, of "I'm going to kill you because you're now no longer in alignment with this energy of who the Anunnaki are."

00:55:58 And, and for the Anunnaki, there's only enough room for their energy. and, and so they, they don't want any other type of energy, and that is the, again, this consumptive self-driven power, and energy, and consciousness that they carry. And so the guides are saying, "Do you see how now that I've seen this, now that this conversation has just been explained?"

00:56:30 They're asking me, "Do you see now how the extreme end, the extreme spectrum of this self-service energy resulted in the extreme opposite, the creation of energy?" They're saying, "Do you see now why and how this planet has been populated by them?" For the most part, it's been populated by them because in their attempt to be extraordinarily self-serving, the exact, every opposite, every extreme contains its opposite, and that's what they've done.

00:57:15 Because that is actually the natural flow of evolution, is that if you are on an extreme, then you need to experience the other extreme to evolve, and that's what happened, and that's why the story of Earth has been what it has been. And it is intrinsically tied to the Anunnaki, intrinsically tied to them because it's also their evolution. There are many species in the universe whose evolution is tied to Earth, and that's one of the reasons why there is a lot of attention here.

- 00:57:48 There is a lot of attention on Earth. It's not, it is not something to ignore, the Akashic Guides are saying. So please, let's take it back to here.
- 00:58:32 So, fascinating. Is that accurate? What I am understanding is that there are a group of female Anunnaki that I don't, why are they female though?
- 00:59:06 Why not male? It's the classification of. Is that correct? So there are a group of female Anunnaki who work in the lab with Enki, the reason being, They're explaining that the reason why it's all female is because of the hierarchical nature and the division of labor that happens, is that that is considered female work.
- 00:59:40 So that is where the females are. And because of their time with Enki and their participation in creation, they too begin to develop a love for humans. Now, not all of them, but a lot of them do, and that slowly starts to make itself known between Enki and these individual kind of females, different females within this lab.
- 01:00:12 Enki realizes that he has this opportunity to support and create and try to change, it's essentially. He tries to ignite a revolution from within the human culture. This takes a long time.
- 01:00:42 But he first teaches humans how to craft different things. He gives them more knowledge than Enlil would have wanted them to have. Is that accurate? And in that is planting the seeds for independence, sovereignty, and a desire for liberation because so far, humanity actually desires to just serve, and it's very difficult to get them out of that because they've been bred for it.

- 01:01:26 So not every human is ready to move out of that way of being. It's only a group of them, if you will, that are ready for this. And that results in an uprising from within humanity. And it is during this time of chaos that Enki chooses to move against his brother Enlil for the first time.
- 01:02:04 And other Anunnaki who have, again, also developed this love for humanity and/or they support Enki, even if they don't fully understand the love for humans. They actually support Enki and, and the creation of life. They try to move against Enlil and other people other Anunnaki who support Enlil, which is the majority actually of the Anunnaki.
- 01:02:35 They are not wanting to let go. They are following Enlil. They're not wanting to let go of what they have. This leads to a very complex operation, they're saying, of hiding the humans of hiding humans. So they take the humans away.
- 01:03:07 Enki and other, other of his followers, I will simply say to make it simple, take the humans away, take a majority of the humans away to bring them to different places on the Earth to both hide them and also attempt to allow them to evolve freely. Okay.
- 01:03:38 So the Akashic guides are saying this is a complex part of the story. And let me see what I can tune into here.
- 01:04:42 Okay. There is a lot of movement here. It is -- It's very difficult to track this energy. Wow. Let's see.
- 01:05:47 Okay. There, there is this complex energy that I'm trying to understand around a, a... the, the feminine aspect and the masculine aspect.
- 01:06:17 There is this something there that is difficult to unlock here that I'm trying to understand that has to do with this separation and this revolution between Enki and Enlil. There, there is something about the feminine that is also

present here.

01:06:41 Hmm. And it feels like it has been so guarded that I, it's, it's difficult to access this information. This thread is so thin.

01:07:46 There, there, there is I, I cannot access this information right now. There is something about the masculine and the feminine, and I will try again at another time. There is something there. Some secret is there, and I can't, I can't get into it. I, I there, there is a... It's really like a lock, but it's, but it's not. It's an energetic little knot that I am not able to get through right now, so I will come back to that at some time and see what I can find.

01:08:23 For now, I would like to know what took place once these humans were spread around. What happened, and where, where would you like to bring this to in terms of a conclusion or, or pause of some kind?

01:09:11 Okay, I see. So they're just catching me up that in order for this revolution to take place from the humans, which is why they're saying it really took a quite a long time before this actually happened, is because humans needed to be taught all of these skills. So they were taught, just like they mentioned, they were taught how to use tools, but it wasn't just tools from the hand.

01:09:41 It was also the tools of mathematics, of the voice, speech, writing. There were many tools that were given to humanity that evolved them to a state, and, and Enki in... He would explain away kind of why this was happening, so he would use a lot of reasons, lies, and manipulation to explain that humans needed this in order for them to continue to serve and be slaves.

01:10:22 So that, that, that somehow was pulled over Enlil's eyes. He, he fell for that. And eventually it was too late to change any of this, to turn any of this around with humanity, so that is how the revolution kind of took place.

- 01:10:52 That's why humanity then was taken aboard ships with the Anunnaki and brought to different places on the planet. They're saying, "And this is where we would like to pause." They're saying this is really a lot of energy for me and my head is in a state.
- 01:11:24 I need to come back now to my body. I'm going to come back to this story, and I would like to pause it for now and come back to this at another time if I may. Thank you. Let me just close out of this.
- 01:11:50 My energy stays with me. Your energy stays with you. That is a piece of history that I am not familiar with, and it has become increasingly of interest to me to understand more about the Anunnaki and our true origins.
- 01:12:36 I wanted to see if I could look in, and I had to ask if I really could be let in, and that was a lot of energy to use. I would love to know your thoughts in the comments and how you received this, and if you know any pieces of this story yourself from the stories through time. And until I see you for the next Channeling After Dark, may you remember your magic.
