

The First Planet of Its Kind

Eluña Noelle

- 00:00:00 Hello, welcome back to another channeling after dark. When I tuned in, the Syrian Council came forward right away and they told me that they would like to share, in their words, their version of our history and so they are going to touch on some key points in our history and when I asked them the timeframe of this, they said there's not a way to really say when this took place because it's before a recorded history and so it doesn't really make that big of an impact, is that an accurate way of saying that?
- 00:00:43 Okay, they are saying yes and no, then how would you say it? They're saying it does not change the meaning so it doesn't really make a difference if we know the timing of when this is happening per se in terms of, let's say, years of 280, et cetera, it doesn't really make a difference, the order in terms of chronological order around some other key points in history can be helpful but otherwise it does not change the meaning of the message and that is really what they are wanting to highlight and bring through.
- 00:01:18 I'm not entirely sure what to think about that so let me ask them, because this feels to me like a continuation or a parallel telling of the information that came through previously about some of the history on earth, okay, and they're saying yes and no, so then they're saying yes and no, it is they are going to give some context and also fill in some blanks that was previously left out and again they're making it very clear that they are sharing from their perspective so it's really their experience of what has happened and taken place on our planet.
- 00:02:07 So I'm just going to go in. One thing they specifically mentioned was the seeding of certain cultures, that's very curious to me so we will see what comes through. Stay tuned. Okay, so they do want to make it clear that they will be working with the Akasha guides to who are architarian if you do not know so that they can bring through the clearest imagery for me, okay, and they're saying so it will take some decoding, yes, they're saying, which you ought to be accustomed to by now, which I very much am, so where would you like to begin, okay, they're saying we first took notice of this planet when she was in her infancy stages prior to life being here, there was pure potential and that is understood as the infinite sea of potential.
- 00:03:20 So am I understanding that correctly? Our earth was a star, is a star still, but she began as a star and there comes to be a point in the creation of a star, the evolution of a star, where just as all living beings she had a choice as to which way she would choose to evolve, which form and path of evolution she would take.
- 00:04:08 So at this critical juncture within the formation and development of her, she chose to move from the pure infinite potential, the black abyss and rather than move inward, which results in a black

hole, she moved her energy outward and because of the control that she exhibited during this outward explosion of energy, she was able to create this planet.

- 00:04:55 So the internal working of our star of our planet earth is that at the time of this explosion, she then had to balance it with an inward implosion and maintain that tension. That is where, in the physical expression, the form of the masculine and the feminine in terms of energy is expressed within her as one being.
- 00:05:33 So the outward explosion and the creation of everything manifest on this planet everything physical is the masculine expression, while the inward implosion and the holding of that tension is the feminine and it is that dance of tension within and without, that is the dance of Yen and Yang, that is the dance of divine union that took place within her.
- 00:06:09 They are saying that they are, other beings are connecting this to that is why, that's the three guides, they are connecting it to the symbol of the oraborus, the drag in that eats its own tail because that is the way symbolically that she created herself. The oraborus gives birth to itself, it consumes itself, it then gives life to itself, fertilizes itself and gives birth to itself again. That is the process of birth, life, death and rebirth.
- 00:06:57 It is that four stage cyclical process that we see repeated again and again everywhere on this planet and within our own selves. This was the first planet of its kind to take that four stage process interesting. So then what did other planets do? They took other, they took a threefold process, some took a twofold process, some only made it as far as one and each of those paths results in a different expression on that planet and for any life that forms on that planet as well as the expression of life. In simpler terms, the dimensions that life expresses itself through is determined by the number of processes that the planet goes through in order to create itself as a planet so that the star goes through in order to create itself as a planet in other words. And they are saying and so it was that we, the Syrians took note of what was taking place on this planet because of this four stage process that again had previously not been seen.
- 00:08:51 They're saying and we knew there was great potential there. So this is bringing up a question but if you would like to keep going then I will hold it. Okay, I will hold it. Okay, they're saying they're going to show me a series of images for me to understand better what is happening before they explain it.
- 00:09:33 Okay, so the first image they are showing is our Earth and is that to be understood energetically? Okay, it is, it is our Earth as a sphere and she has already made the choice of the explosion and implosion. So she has chosen this path of a four-way planet, if you will. And the way that she looks they are saying is to be understood energetically but the way that appears is really as a black shimmering sphere and I can see that all the way around her there is the glimmer of a light and encompassing her diameter and that is the expression of the pure potentiality that she contains. That is when the Syrians first took note was when that was happening within her because they understood that she would express a multitude version many different types of life forms.

- 00:11:13 A multitude of versions of the all they say and so they said we continued to observe her and recognized that we had the opportunity to see in some cases from one perspective rather first hand the evolution of this type of planet and they said what made it vastly more interesting to us is that our orbit came into contact with her and they say for a time when she was still a star the light of her star shown on their planet and it was it was quite a distance away of course but when the light changed is when they knew something was going on and so that is when they chose to investigate more closely because they knew that the evolution here is directly tied to their own and they wanted to understand what would be taking place here so that they could also understand their own evolution and what would be taking place with them okay.
- 00:12:39 Okay so they are saying that time went on and they observed beings who also recognized the potential of earth this is into the future over the course of a long time that they are observing other beings coming and investigating earth because the energetic ripples that are sent out one of star chooses its path is felt everywhere in the universe and they say the same is true for any individual being or a group of beings when they choose a path of evolution that choice is felt everywhere because it is it all affects the all and so this choice being the first of its kind was felt everywhere there was no way to hide the light of this star there was no way to hide the choice that had been made and there was no call to and that is why many beings came to investigate and see what was happening and they're saying that there are there were a series of plans and attempts made to take would take over be okay take control or take over
- 00:14:20 the evolution of this planet to be to in a way with that being appropriate analogy okay the most appropriate analogy would be like taking a wild stallion or any wild animal and domesticating it that is the best analogy to be made as to how some of these groups wanted to approach the earth they wanted to domesticate it and that's the to their own liking to what would serve them like breeding certain animals breeding certain traits and qualities and breeding other traits and qualities out that is so both domestication and select breeding is a very appropriate analogy for what certain groups wanted to do many of them failed pretty much all of them failed and that has to do with the earth herself rejecting it so that all of those attempts that were made they're saying an appropriate analogy would be like a virus coming into your body your body fighting off the virus and your immune system being stronger because of it
- 00:15:46 that is that can be likened to what was happening with these groups each attempt that was made and then how she overcame it made her stronger and more resilient and in its own way it did affect her evolution because it did direct certain things that happened here in terms of the expression of species and the expression of life in a variety of ways whether it be through microbial life all the way up to animal life so that took place and they're saying that as part of the reason why she cannot be properly dated the way that we are attempting to date her because there are so many layers that have been mixed together and also that have been simply placed on top of one another so to speak and so there are certain parts of our planet that are perceived in one way as one expression of life when in fact it was previously a completely different expression of life such as certain rocks on this earth large monumental stones
- 00:17:13 bolters rock formations that previously were not rocks they many of them were massive trees and they played a role in the evolution on this planet and also the life that was able to be

supported on this planet at the time of their living existence in another form they are still alive as these rock formations simply in another form okay and they are saying that is part of the process that she chose this fourfold process of birth life death rebirth so these different parts of her have been reborn into something else that is why alchemy is such a significant focus on our planet and for our species because that is our understanding of the process of our earth's evolution and consequently that is our evolution as humans is through the process of alchemy and alchemy transmutation they say okay and they say and so it was that we continue to observe each of these groups not wanting to interfere ourselves because they knew that would be going

00:18:34 against the very evolution that they were also connected to because each time she was infiltrated in a way with having certain species come to try and control or guide the evolution here their evolution the serious evolution was also affected and they did not want to interrupt what was happening because they simply understood that it was part of the process that was taking place and it was part of her choice as to how she was evolving okay and so the time came when a group of beings okay and if you could place this for me in that context hmm okay so then I see wow that is um am I understanding that correctly I am okay so this is very interesting and a little challenging to put into words and I'm going to say what I believe I'm understanding and it's all telepathic energetic communication here so even though they've told me yes I understand putting it into words is quite different so if they correct me then I will say so what I am understanding is that

00:20:26 part of the reason why it is so it is essentially impossible to accurately date when certain civilizations have been here and when certain things happened in our history is because the beings that came here found a way they were able to move through multiple dimensions and versions of the earth which was hijacking her own evolution but that was their intention was to find the version of earth in which they succeeded is that accurate okay and so certain texts have described certain beings being present at different times and some of them overlap and some of them seem contradictory to one another but in fact they are not contradictory it is simply that they were present in multiple versions of earth and then something very strange happened and it's when the earth shows to fight it's when she figured out how to essentially fight back if you will like fighting a virus she figured out how to stop it from happening which was to

00:22:07 collapse all the versions of her is that accurate to say it that way okay so when she figured out how to collapse all versions of her that is when the last quote reset happened on our planet and now no more resets can happen so we've had reset after reset where the minds and memory of humanity has been essentially wiped clear and so it has appeared as though we are existing in a certain time frame and everyone just thinks that that's where they've always existed but they haven't they actually have existed at other times but currently every form of the earth has collapsed into one point is that still accurate okay that is part of what allows us as humanity to return to our true multidimensional nature because there is less confusion and interruption of signals with these different versions that exist instead there is just one expression now even though there are still parallel realities they are collapsing into one and because we experience time

00:23:51 in a linear way that collapse although it happens instantaneously it does not happen instantaneously here and here within the planet and they are saying for good reason because it actually would essentially fry our system we would not be able to essentially very few people would be able to handle that it would be very dramatic and traumatic for the brain because all of the information that is contained within the one point of consciousness for each individual that has existed in multiple parallel versions would all collapse into one and they are saying that is what you can see sometimes with people who are schizophrenic there are people who have experienced that collapse as a almost like a one-off cell that would happen to and it's very jarring they cannot make sense they're analytical mind cannot make sense of what's happening and that's not true for every single person who has been diagnosed with that but that is that is an expression that is

00:25:04 part of the reason where that comes from for some people okay so okay so they are saying they want to return to certain points they wanted to give that overview and now they want to return to certain points in time namely they are saying we want to return to the seeding of the dog on tribe okay so now that I'm understanding that this is a multidimensional and non-linear experience um how can I understand or explain chronologically well so it was pulling from I see okay so there was a civilization called mu this civilization held what we now refer to as the secrets of Shambala Nirvana we could also say that was their expression of heaven on earth is that accurate and they did succeed in attuning themselves to living in the frequency of what we refer to as the fifth dimension and heaven on earth and those beings have already ascended from the earth plain however there are some who were pulled through time to be brought to the dog on tribe

00:27:24 what we now call the dog on tribe which has its history in much of Africa okay wow and they're saying this is part of the reason why there is a misconception at least there was previously on our earth a misconception about all of life beginning in Africa when that's not actually the truth because life began everywhere on this planet but there were beings there were certain beings from the mu civilization that were pulled through time with full awareness by the way they chose this to come to Africa what we now call Africa to be a part of the seeding of a new humanity so that it could support the ascension of consciousness at this time is that accurate okay so the people who there were this was after this was after one of the great resets and after the great flood one of the great floods the could would we say it's the final great flood the great flood that took down Atlantis is that accurate okay so beings from Atlantis Syrian beings and beings from

00:29:28 you came together to seed a new culture on Africa as well as later in South America so that is why the elders of the dog on tribe now referred to as the dog on tribe know the story that their ancestors are Syrian and they still share that story to this day the original elders of that group of people that we call now the dog on tribe were in fact from you and they intentionally refrain from using what advanced energy techniques and abilities so that version of humanity could be brought up and remember on its own because again it would be interfering with that version of Earth which would create a tumultuous effect they're saying in her development if it was given too early on because the level of consciousness that humanity had now been returned to was

not yet capable of holding these advanced energy techniques okay and so they're saying that progress went very well that is when chem was thriving in what we now

00:31:15 call Egypt the chem was thriving and energy practices were moving along at an appropriate but also somewhat of a rapid rate because it had not been completely forgotten and being taught by some of the original masters of energy it was given somewhat easily because the teachers were so skilled at what they did when this version of Earth was then interrupted it was known that a secondary well it really would be who knows a tertiary of a fourth of fifth a who knows what number of seeding would take place then in South America and what they are bringing up is very interesting they are showing the spinning of a wheel but oh gosh oh it is the spinning of a wheel wow which is the wheel of samsara which is also the oraborus the serpent that eats its own tail it is the alchemical transmutation process and it is also the medicine wheel they are all the same thing the colors that align on the wheel on the medicine wheel also align to the stage of

00:33:18 alchemical transmutation and evolution that is taking place on this planet it began in the black the negrado state I believe it's called yes the negrado state and moved to the yellow state it is since moving to the white color and will complete in the red color roubado state these are the colors that align to the medicine wheel and that is where we find okay that is where we find our current state of consciousness is from white to red and that movement and transition happens with the joining and merging of consciousness that various prophecies such as the Hopi prophecy and many other stories have told of the eagle in the condor there is a relationship there between these states and steps of evolution so the group that was seated in South America was precisely to support this movement from white to red and it is only in the blending and merging of this movement that we are able to enter into this red state that this ultimate completion state

00:35:54 which is a joining of the hearts and the minds without letting go of the body they say okay so the group that was seated in South America in what we call Mexico Central America and South America it was really more connected at this time the groups that were seated there the elders knew of this transition but did not know the effect of the transition so that was as much as could be shared again without overwriting the evolutionary process of the earth the amount that could be shared was and it was only the story it was the story of how and how to make it happen but not necessarily the what would take place on the other side because that is part of the process of unfoldment and of discovery to enter into that naturally oh my okay I just need to take a moment my mind is really wanting to go very fast with questions and information so I just need to take a moment to come down again hmm okay they are saying that these prophecies that they speak of they are unfolding

00:38:10 precisely as they have been described and a way to understand this current process is a bit like moving through every stage every step that they have described the black the yellow the white the red moving through every stage of that in a rather rapid succession the reason for that being to essentially not miss it how can I say it's like a surefire way to succeed that's the best way to say it is that an appropriate way to say okay so that is a part of the defense mechanism if you will of the earth against this infiltration is actually to speed up time the dimensions that she is

involved and spread out in which is part of her process of implosion and explosion the tension that she holds there is the number of dimensions that she inhabits that's what determines the number of dimensions that the earth inhabits is the tension that she holds that's why there are some planets that don't move through all of the dimensions but the earth does and that means that

00:39:39 the beings that inhabit the earth also do however the beings that are not native to the earth do not they do not inhabit every dimension they are limited because of where they come from that's simply not their expression and the result of them being present in the dimension that they are which is the dimension of time more or less it can be simplified into that means that it results in a speeding up of time because that's her defense mechanism against these intruders I hope that this makes sense it is it is it is like um white blood cells coming to a certain part on the body and proliferating in that space to remove an outside virus an invader of what have you which technically not a virus because physiologically that's not exactly how a virus works but that is how it can be understood that it is a it is white blood cells coming to a space to attack so to speak the outside invader and that is expressed in the speeding up of time

00:41:01 so the speeding up of time is like white blood cells coming to the dimension of time because the beings that inhabit that space they are part of our evolution now and also they are being let go of so the earth is going to get to a place where that dimension is spinning so quickly again this is all metaphorically speaking but the fourth dimension will be spinning so quickly that it will be overlapped it will become the same dimension as the fifth and then there's no more time it just becomes one just like how if you hold a string with a ball tied to the end when you move it around your head slowly you can see the ball but pretty soon if you move it really fast it just looks like one continuous circle that is what will happen with time with the fourth dimension essentially becoming one with the fifth dimension that is why our bodies and our interpretation of time and our consciousness our entire evolution is speeding up

00:42:21 and shifting and changing so dramatically because we are merging with the fifth dimension this is not about a collapsing of one dimension it is about emerging into another just as it can be also remembered that it is not about leaving and moving outside of the body it is actually about the body moving into multiple dimensions in this ascension process well okay so they are wanting to speak of current times future times right now with this speeding up process with this fourth dimension merging into the fifth not all beings will be able to get there that is simply a natural effect of evolution not all beings will make it and they are not meant to and it is okay it is a natural part of the process of what she has chosen as birth life death rebirth the beings that do not make it they will simply go through their death and have a rebirth that is all it is not a lost cause it is not even a missed opportunity it is simply part of the process of her path of evolution

00:43:59 and so there will not be a great reset of humanity's memory like what has happened before instead there will be a merging of memory which they are saying has already happened and many of you are already experiencing this many of you are already and have been having for quite a long time past life memories or parallel life memories being present with you and that is part of the reason why many people's what we call psyched gifts have been coming online they have been able to see what is happening what is coming and why many people are able to

communicate with different dimensions now because the dimensions are becoming one and people's consciousness is speeding up to a degree that they are able to tune into that they are saying however this speeding up process is still jarring it is still it is a momentous occasion worthy of celebration and also it is extremely volatile in by nature by nature it is a volatile experience and that must be

00:45:28 understood and not feared they say the fear will be a resistance to the change and it will feel more painful in its own way energetically emotionally mentally it will feel more painful if it can be understood from a relaxed perspective that these volatile times are the expression of this speeding up experience then the best thing and the best advice would be to sit in the middle of that storm to sit in the center of the hurricane where it is still where you can watch all of it spinning around you and you can choose what you keep your eye on if it is outside of you and when it is too much to see what is happening outside of you that you remember to turn your gaze inward that you remember that this is where the evolution is taking place and the evidence the so-called evidence the so-called physical experience outside of you it is not telling you what the future is going to look like that is not how it has to be when your inner world becomes stronger brighter

00:46:54 more real to you can open your eyes once again and what you will see around you is no longer just a storm it is a clearing away of the old and you are able to see through this spinning hurricane to what is arriving and landing at the same time that this hurricane is taking place you are able to see through it this illusion this storm and the many morages that they try to place in our eyes will soon fade and in the meantime maintaining your inner gaze and creating your inner world is of paramount importance it is what will bring you a sense of centredness a sense of peace amidst all of it and as you are able to open your eyes from time to time to see what is happening in the outside world so-called simply for the awareness of what is taking place and what you may be experiencing energetically if you are in the pitch black and you because your eyes are closed and suddenly things start getting thrown at you it can feel much more jarring when they hit you

00:48:33 because you don't know what they are which is why it is important to open your eyes from time to time to understand what is happening in the collective because those are energetic blasts that they are attempting to throw at you and sometimes what can bring calm is knowing what is happening what is the collective story at this time because that collective story is the air that we all breathe it's the water that we are all drinking and we cannot help but breathe the same air and drink the same water so while it is not always helpful for every being to know what is happening if you find yourself being very jarred and frightened it can sometimes be helpful to see what's going on in the outside world so that you can say ah this is why I have felt that way it is because of this so-called event that is taking place it's because of this story that they are telling to the collective that's why I felt this not to take the information as the indication of every

00:49:47 experience you're having inside but again to have some context a balanced perspective within and without but never for saking your own inner world for the outer the inner world that you are creating with conscious intention with peace and love in your heart not creating out of fear because that's not creation for life that's creation for fear but that world created with life that is

the world that you will emerge into the storm will settle the dimensions will merge the settling and dropping of this hurricane will take place and in that time you get to create everything that you will then open your eyes to when you create with love so if you arise in the morning and you are feeling uncertain it is time to go within and create and if you arise in the morning and you are feeling uncertain and you say there is no way that I can create from love today then think about your children and think about your children's children

00:51:24 and think about the children whom you will never meet and create for them they are saying they would like to give one final word for awareness without proper cultivation without a centering practice daily in the heart of your heart in the center point in the zero frequency where all is still and only love exists without a proper cultivation and practice of that daily no matter what level of consciousness you supposedly hold no matter what level of ability you have to tune in to the unseen world to other dimensions to other frequencies and other beings you will still be affected by this pelting storm outside of you that means when tuning into and trying to express a message from another being from a multidimensional space a group a future time fear will come through simply because you are being pelted with the frequency of fear and there is not a deep enough anchoring in the center point this is true of every being no matter what age they are no

00:53:42 matter how long they have been doing work in this way no matter how many years they have been connected to a being or a group of beings no matter if they were born psychic that happens and can happen to anyone to anyone it is important to know this so that you are remembering that with each story you tune into you are creating that story which is why the inner world the inner story of peace of love is the greatest story that you can tell yourself and create for all of life here and always take comfort in the space within you take counsel from the space within you your sacred ever present heart unwrap yourself from the stories of your mind or another's mind and rest in the loving stillness within you that is the greatest act of rebellion of revolution that you could possibly make at this time that is what stills and settles the storms if all beings everywhere on this planet chose to settle the storm chose to rest in that stillness

00:55:52 all storms would settle any story any transmission any message that attempts to bring up a feeling of fear or urgency is simply coming from that same storm of high speed that is whirling around each of us and the planet at this time your greatest act of sovereignty of revolution comes by being in that stillness cultivating that love and being a presence of peace at all times and it is a practice so try it every day until it becomes natural and remember when you cannot do it for yourself who can you do it for? because it is not just you that benefits it is not just your storm that is calmed it is all storms that is the greatest guidance kept that can be given at this time the series say you thank you very much for coming through thank you for all you shared hmm thank you to every being who's been present here thank you to the Akasha guides and my own guides thank you my energy stays with me your energy stays with you

00:58:32 hmm that is still landing quite deeply for myself hmm may your path always be blessed with flowers and may you remember beauty in every moment and until next time may you remember your limitless magic today
