

The Soul's Experience at Death

Eluña Noelle

- 00:01:38 I call on my angels and guides my Higher Self and the Ascended Masters who guide me to please be present with me. Thank you. I call on Archangel Michael to please be present. Please surround this space. Please keep my channel open, clear and protected for the duration of this transmission.
- 00:02:01 Thank you brother. I call on the beloved Elohim and Shekhinah light angels to please be present. To please surround this space, to hold this space in your loving frequency and vibration. I ask that you allow only that which is of the highest vibration, and for the highest good of all to come through at this time.
- 00:02:25 Thank you. Thank you to the beloved dragons and unicorns for greeting the underworld below. Thank you for holding this elemental space on behalf of the highest good of all today, and for bringing through your own perspective. Thank you.
- 00:03:01 I call on the Arcturian counsel of Joy. And the Akashic Guides to please be present. Thank you for your site, for your presence, for your wisdom and your guidance today.
- 00:03:31 I call on my soul to be present and to speak through today as well. I welcome the expression and telling of my own experiences of crossing over in parallel lifetimes, as it is helpful and for the highest good of all.

00:04:07 May I reflect the light of the one? May I hold the other self as the object of love before me, that which I am serving with utmost care, devotion and divine reverence. Allow me to purge all negative and self oriented thoughts, egoic drives, selfish consumption and limiting beliefs from my being.

00:04:37 May they be transmuted into wisdom. May all beings know the light of one. May all beings know the truth of love and the love of truth. May I be a shining reflection of this truth in my core, outward and inward.

00:04:57 Ever may my heart be ever my guide, shining with the flame of the one. May I be a representative and example of virtuous integrity. Sweet creator, beloved creator, you made me in your image.

00:05:23 Make my flame thy flame. Make my will, thy will. I serve thee ever and forever as the one true light. So it is. Ashay.

00:05:44 Amen. Thank you God. Thank you God. Thank you God.

00:06:21 So beloved Arcturian and Akashic Guides the question that I want to pose and what I would like to look into today, is on the nature of death from the human perspective, to know what happens when a human dies.

00:06:46 Okay. I will introduce this first and then come back to you. Thank you. Hello and welcome back to another Channeling After Dark.

00:07:08 I have been posed with this question and I myself am very curious about it. And that is the age old question. What happens when we pass from this physical plane of existence as a human? What happens when we die?

- 00:07:32 I have been given the opportunity to be close to someone who has lost someone recently, and that has brought up this question of what happens and when grief from losing a loved one comes into our lives.
- 00:07:54 It very much has the ability to open up layers and aspects of ourself that we have forgotten or ignored in this lifetime. And on a personal level, I hold the understanding that contemplating one's own morality and death is actually quite important and rather empowering when done from the lens of reciprocity and gratitude for the gift of this life.
- 00:08:42 And so I would like to ask the Akashic Guides and the Arcturians that work with me, who are very present already. I would like to ask them what happens. And I began that query and they responded with, it depends on how one dies.
- 00:09:12 So I'm going to go back into this conversation with them now. I'm just bringing you up to speed as to what has already transpired. And I would like to learn more about this. So one moment. Okay.
- 00:09:33 So what happens when someone dies? They are saying it depends on the way in which someone transitions, crosses over, or has their life taken from them in a way that we would deem as tragic or unnecessary. In most cases, they say, okay, they say, we will begin with this description.
- 00:09:56 When a life is taken unnecessarily, that soul has a moment of reconciliation and reckoning with where they currently are. As in when a life is taken unnecessarily, it usually results in shock on the part of consciousness that the soul is connected to within the human body.
- 00:10:29 That necessitates a group of beings to come forward to work with and support that soul so that they are able to come to terms with their own death and recognize even in that transitionary plane, that they are greater than what they currently are experiencing in that moment, that they are

connected to an eternal soul who is likewise connected to the source of all creation in the moment of transition.

00:11:12 That aspect of the soul remembers once again wholeness and what it is to be unified, and is then able to return to the heart of their soul and become one again with their soul self.

00:11:35 That is an accurate enough description in human language. They say it is far more complex on an energetic level to understand what is happening with the current level of consciousness that humanity now has at this time.

00:11:56 And so that is the most appropriate way to describe one scenario in which a life has been taken suddenly and unnecessarily. There are other cases in which the life may not be taken suddenly, but is still taken unnecessarily.

00:12:18 In these circumstances, there are multiple paths. The soul may choose to go. That aspect of the soul may feel that their time on earth was incomplete and wishes to return.

00:12:42 There are multiple paths that can be taken from that decision Which may result in the soul returning to Earth rather quickly, either very close to the being that took their life, or potentially, and in rare cases, acting as a walk in.

00:13:11 In other cases, entering into life in opposition or in direct contrast with the life they were previously experiencing, or in another example, entering into the same more or less position as the one who took their life in order that they understand why their life was taken.

00:13:46 So there's one offshoot with four potentials. They're saying there are many more, but there are a few examples. Another experience that can take place when a life is taken unnecessarily, but not suddenly, may be due to the fact

that the soul foresaw their own death and knew, whether through very obvious means or through intuitive means, that their life was going to be ending soon.

- 00:14:24 In that case, the consciousness of that being the aspect of that soul has had the opportunity to contemplate their death more or less, and consider how they would like to close their time out on Earth.
- 00:14:46 That can happen because of an advanced soul being aware of their death and not running from it. It could also be a soul who has not yet fully accepted death in a human sense, and then chooses to run from it.
- 00:15:08 In the latter case, it is challenging for that aspect of the soul to cross over because there they know they are going to die and they resist it anyway. With time to contemplate, that brings an added layer to their next series of choices regarding a following life that they will inhabit because they will be faced with other opportunities to come up against death, whether through close relatives, loved ones, children, friends, etc. in another lifetime, or they themselves personally will have experiences with death in their physical body.
- 00:16:11 That is done as an opportunity for the soul to return to the contemplation of death, and not run from it while they are still living. For a soul on this other side, this other path, who dies unnecessarily, contemplates their death, knows they are going to die, and does not resist.
- 00:16:44 They have myriad opportunities and choices based on. Whom they are saying. We would like to choose our words wisely here because of who is going to receive this message? Okay.
- 00:17:06 All right. Please give me the energy. I will do my best and ask you. Is that neutral? Okay. Based on what a soul chooses to create in their lifetime, they have myriad opportunities in terms of how they will move forward.

- 00:17:32 Abstract enough. In other words, if a soul knows they are going to die soon and contemplates their death and fully accepts it When the time of their death comes and they cross over. Based on what they have done in that lifetime, they're given a few options.
- 00:17:56 Likely, they are going to enter into a life in which they are going to understand the opposing view or a complementary view. So we could say contrasting or complementary of the life that they have just lived in order to act out, to create and to learn from qualities and perceptions and lifestyle that has differed from the one they have just left.
- 00:18:36 Okay. All right. they are saying. And then there is a going back to those who die tragically and or unnecessarily. A third offshoot is when a being chooses to take their own life.
- 00:19:03 This is the most tragic of all is what they are saying. Because the life has been squandered, the gift of that life, the energy that has been poured into all that that being experienced has been.
- 00:19:36 I am considering the word based on what they are giving me. The best word is spoiled. The energy has been spoiled. So.
- 00:19:57 To give an analogy. It is a bit like a farmer harvesting their crops. And the farmer has the most beautiful crops, the most beautiful harvest, and willingly and consciously chooses to allow a whole portion of the harvest to rot in his household.
- 00:20:33 That is an appropriate analogy for one who takes their own life squandering the gifts, spoiling the energy that was available because at that point, the lessons, the healing has not crystallized into the body of the soul.
- 00:21:06 Don't take that literally because a soul does not have a body in that way. A soul is not a body. But that is an appropriate way of describing it. If we

want to look at the soul as perhaps an interface of source, then the codes, the programs that that soul was meant to learn and download have not finished downloading.

- 00:21:38 When life is taken and cut short by the hand of itself. And so this incomplete download, if you will, is then kind of stuck. And there is this process where now in most cases, whatever that pattern or program that is meant to be learned by the soul, first it has to be completely unlearned, unwritten, and then rewritten again.
- 00:22:12 It has to be completely removed from the system and then start the download again. That is clear. Okay. That creates a ruffle in the fractal pattern of the soul.
- 00:22:33 A wrinkle, if you will. This folding over. within the fractal pattern of the soul is created again, not to be taken literally. That is just a descriptive way of understanding energetically what is happening.
- 00:22:57 Okay, they say we have exhausted this topic, and so they would like to move to the other types of crossing over and what takes place. In any case, no matter how one dies or transitions, the same thing happens to all souls.
- 00:23:21 And that is a life review. Okay, so please describe. Can you please describe in your words what a life review is and what happens? Because I have heard of that term before, but I don't know what that entails. Thank you.
- 00:23:42 They said we will describe it to you. Okay. In accurate detail. Okay. So the aspect of that soul is shown a series of events.
- 00:24:03 From there, the lifetime they just left as directed by their soul. Okay. Also called their oversoul. Okay. Whatever the Oversoul deems as important and necessary for that aspect to learn and grow from.

- 00:24:31 Based on the life they just lived is what is shown to them to remind them of what they just experienced. While they still have a connection to the consciousness that they are leaving behind. Once the connection to that consciousness is severed, they return to their soul, remembering everything again, determining what they are then going to transition into.
- 00:25:09 But that comes later. They say that's the next phase. So first they see these scenes and based on the energy exchange between that soul, the consciousness that they are connected to and the scenes that they are watching based on that energetic exchange in that triad determines.
- 00:25:48 And gives merit to the next experience that is most appropriate for the soul to learn and therefore live. As I am asking for an example, because that is quite abstract. I understand from an energetic level, but I want to give an example.
- 00:26:13 Okay. Okay. They are actually encouraging me to give a simpler example instead of what might actually happen in a life review. It can be equated to a child undergoing a reading test.
- 00:26:35 So the teacher is one point of energy. The child is a second point, and the book and the comprehension and reading ability of the child is the third point of energy. That is the triad that can be compared to what happens in a life review.
- 00:26:57 So the soul, the the soul is the teacher. The aspect of consciousness is the child. And the scene that is being depicted is the book that is being read. And between those three points, the soul is able to determine the reading comprehension and the literacy level of the child, which then tells the teacher what the next appropriate book is for that child.
- 00:27:33 Okay. Clear enough. So. They are saying, as you can imagine, as a soul

progresses, just as a child progresses and comes to read increasingly complex topics and books, so too does the soul grow in its ability to have a complex consciousness.

00:28:10 I am very curious about what they mean by this. What is your definition of a complex consciousness? They say many facets, angles, underpinnings and undersides.

00:28:32 They say, just as something that is one dimensional is simple, flat, something that is multidimensional is complex. And so a soul being multidimensional.

00:28:52 Wow. Okay. A soul being multidimensional. Is working, so to speak, living lifetimes after many lifetimes to gain a multidimensional consciousness that can exist.

00:29:19 That both encompasses and is inherent to the soul itself, as in it lives both within and beyond the soul. A paradox.

00:29:39 And a truth. Okay, I was asking again for another comparison. They are saying just as we as this point of consciousness exist here and now, we also encompass all of our childhood selves and in fact, all of the selves that we have been in every moment preceding this one.

00:30:13 We encompass, and as we learn to live with a multidimensional consciousness, we come to encompass all of those and beyond them, Both within and beyond this level of consciousness.

00:30:37 That is one major facet of this awakening process and paradigm that we are currently living through and undergoing yet again as a species on this planet. Which is why the nature of what happens when we transition is and will continue to be a growing topic of interest for everyone in the world, viewed and perceived, both from a scientific attempt to understand what happens when consciousness leaves the body, as well as from a more spiritual understanding of what happens when consciousness leaves the body.

- 00:31:25 Science is on the brink of beginning the experimentation and the hypothesizing of what happens to consciousness upon leaving the body. Due to the advancement in quantum physics and the exchange of information that happens between particles, particularly when it comes to the experiments that take place when one particle is tied or entangled with another particle and one of those particles disappears, the other one does as well.
- 00:32:08 No matter what time or space either particle is inhabiting, it is from this that a hypothesis and theories will develop around what happens when consciousness leaves the body. Okay.
- 00:32:28 that's quite interesting. Look, to be looked into more in the coming years through quantum physics. They say it will be looked into more through the coming years. Okay. Thank you. That's very interesting. So. With this life review and a complex consciousness, is there more that you wanted to say?
- 00:32:52 All right. Please continue. Thank you. They are saying all of life wants to evolve into greater, more complex forms.
- 00:33:12 For the simple experience of what it is to grow in complexity. And so when a soul transitions And has the opportunity to expand its complexity and consciousness.
- 00:33:34 It does so willingly and through the oversight of their soul. For the next incarnation that it will have. And in that entering into another phase, the soul, the consciousness of that soul in that lifetime is living with a complex consciousness.
- 00:34:04 To walk the path and return to the simplest place of all which is home. So what you're saying is we work to be as complex as possible, so that we can then come here and try to remember to live simply.

- 00:34:35 Okay. They're saying more or less. Okay, I'll take that one with me. Remembering to live simply. Okay.
- 00:35:02 They are saying it truly does come down to a rather simple process of an exchange, as described in the analogy of the teacher, the child, and the book and the literacy assessment. They are saying that the a a A complex and often misunderstood experience is the experience that precedes life on Earth.
- 00:35:40 Please go into that. I'm very curious. They are saying it is likened to descending a ladder, where you move down one rung from source and are now experiencing a different type of consciousness and a different experience altogether, as there is the illusion but still understanding of separation.
- 00:36:21 Moving farther and farther down the ladder, a soul moves through multiple dimensions and experiences of creation. They can be called life, but they are not necessarily what we would consider living, other than the fact that they are imbued with spirit and are not inanimate, but also not living to what we understand living to be, and certainly not comparable to life on earth.
- 00:37:09 As one continues to move down this ladder, descending consciousness into denser aspects of form, finally arriving in the densest aspect of form, and the form that contains the consciousness that is the furthest removed.
- 00:37:36 Perceivably from source. That is, when you arrive in a human body and life in this three dimensional plane. That is an equal process. Wow.
- 00:37:57 That is an equal process to the process of ascension, as we understand it, to be on the human level. Descending in consciousness to arrive in a human form requires.
- 00:38:21 A different type, but equal in effort of perseverance on the part of the soul.

As we persevere in this lifetime to become more in touch with the divine. The descension process is to become more in touch with the dense experience of physical form, in this case as a human being.

00:38:54 Wow. That is just. Landing so deeply for me in this moment, because I have never considered that before of what it took to come into this human life.

00:39:20 And they are saying that is why, from only this one perspective, life is a gift. It is something that we have worked for as a soul. We have persevered to become human.

00:39:44 I have never considered that before. It's never even crossed my mind. That we might have to actually work. And give effort and energy to become a human. And they are saying, but when you understand it from an energetic level, it is the only thing.

00:40:10 It is the only sensical way. It's the only logical explanation because in order for a soul to concentrate its consciousness into this one form. It has had to do a lot to funnel it and to land, to learn what it is to hold this point of consciousness right here.

00:40:37 And at the same time, we as this human, are working to anchor our consciousness to our soul. That meeting, that infinite dance, the the lower triangle and the apex of that triangle meeting the upper upside down triangle, the infinity loop.

00:41:05 Just. And the reason why this feels like it should be so obvious is because of the underlying law that precedes all laws. As above, so below.

00:41:29 Wow. Oh, okay. Wow. Okay. They are saying this is why.

00:41:50 The soul and ascension is not meant, and should not be perceived as greater than the life and experience of being fully human, because you have

worked to be fully human.

- 00:42:12 You have persevered through trials as a soul to become human, just as you are persevering as a human through trials on this earth, to return once again to unification with your soul.
- 00:42:36 It is one of the greatest adventures that a soul can ever experience, that of life on planet Earth. And there are infinite adventures to be had and infinite trials to persevere through an infinite levels of consciousness, growing in complexity, adding to the fractal nature and pattern of your soul.
- 00:43:17 All souls and all of creation at large. There is no end and no beginning to creation. There is the ever unfolding present moment where your consciousness is directed.
- 00:43:42 And the more fully present you are in that unfolding moment. The more fully you are experiencing the divine spark of your soul.
- 00:44:07 And the greater that you look upon yourself. And this moment with the eyes of love. The more you are in touch with God itself. Who sees all of creation through these eyes?
- 00:44:35 The infinite eyes. Of conscious thought.
- 00:44:58 So we wish to leave you with this. To consider and contemplate along with your mortal life. And inevitable death. To contemplate alongside it.
- 00:45:24 The eternal presence of God, the creator. And to consider more fully your.
- 00:45:49 Your experience in Ascension. And the choice that you made to descend. Knowing that both are infinite expressions.

00:46:12 Meaning There is no end and no beginning to you, to your ascension, to your descension. There is only the ever unfolding moment right before you.

00:46:40 And acting from any other level of consciousness. But this one tangles you up in a knot of stories from lives already lived.

00:47:18 Is there more that you wish to say?

00:47:38 With truth comes the understanding of why a soul does what it does. This is the one truth, not the subjective truth of the myriad voices spoken within the human mind and beyond in the human world around you.

00:48:07 This is the one truth that unites all beings, all life, all of creation. It is the ever expansive presence of God, the creator, the all.

00:48:34 In every fleck of dust. In every moment. In every song and in every breath. How present can you become to this all encompassing omniscient presence?

00:49:10 That is the great adventure of the soul. And through these layers of ascension and descension that the soul undertakes and overtakes comes the reminder, the one truth.

00:49:38 Of this ever present presence. And learning to see again from the eyes of the beloved.

00:49:59 We leave you with this truth.

00:50:37 Thank you. Wow. Thank you so much to all the beings. Thank you Akashic Guides and beloved Arcturians for coming through. Thank you for allowing me to see in.

- 00:50:59 Thank you for allowing us to learn from you and with you. To remember again this one truth. Thank you.
- 00:51:25 My energy stays with me. Your energy stays with you. Well, as usual, I am deeply humbled by this transmission.
- 00:51:57 And I will. Be contemplating this. Just like you. And integrating this. As we all must. It seems that.
- 00:52:22 The more we learn and grow our consciousness. The less we have to truly contemplate. The paradox of growing a complex consciousness and coming back to simplicity again.
- 00:52:52 Thank you very much for joining me. And until I see you again, may you remember your magic today.
